OPERATING INSTRUCTION

STARTING THE UNIT

1. First, please rotate the humidity switch in a leftward direction to the end (which is the “OFF” position).
2. Plug in the dehumidifier.
3. Rotate the humidity switch in a leftward direction to turn on the unit. The humidity will decrease every time you rotate the switch to left side, and it will enter continuous humidifying mode when you rotate it to the end.

TURNING OFF THE UNIT

1. Please rotate the humidity switch in a rightward direction to the end, and then the unit will be turned off.
2. If the dehumidifier is not in use for a long time, please disconnect the power cord plug from the outlet.

WARNING

1. When operating the dehumidifier, please do not set the humidity higher than ambient humidity.
2. When indicating light illuminates, please pour the water out of the tank and put it back. Then the product will resume working.
3. When the product shut down, please wait at least 3 minutes before restarting the unit to prevent damaging the compressor.
4. The value on the calibration shows the relative humidity.
5. The applicable operating temperature range for this unit is 5-32℃.
6. If the dehumidifier can’t start (the indicating light does not illuminate) or the dehumidifier shut down unreasonably, please make sure whether the plug is connected firmly to power supply. If the plug and power supply are in normal condition, please wait for 10 minutes before restart the unit (because it takes 10 minutes to reposition). If the unit still does not start after 10 minutes, please ask your local distributor service station to repair.
7. When the dehumidifier is operating, it’s a normal situation that the working compressor may cause some heat and bring the ambient temperature up.
8. When the product is defrosting, the related indicating light will illuminate. And during the defrosting, the compressor will stop but the motor will keep working.

DRAINING INSTRUCTION

Draining water can storage in the water tank, or be continuous drained by PVC tube. (The PVC tube is not included in the product.)

USAGE OF WATER TANK

When dehumidifying, the condensing water may be drained to water tank. And the unit will stop working with indicating light illuminating when the water tank is full of water, please pour out the water that time.

1. Take out the water tank as Fig 01, and pour out the water.
2. Put the water tank back.
3. Then the unit will follow the setting humidity to work automatically.

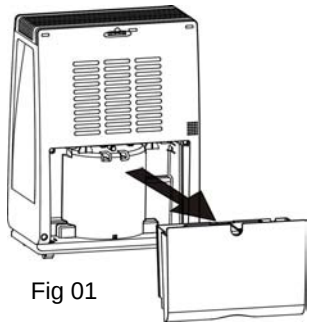

Fig 01

CONTINUOUS DRAINAGE

1. Before continuous draining water, please take out the water tank and plug a draining tube to draining hole. (See Fig 02.) Then put the water tank back.
2. Draining tube should place lower than the draining hole to let water flow out.

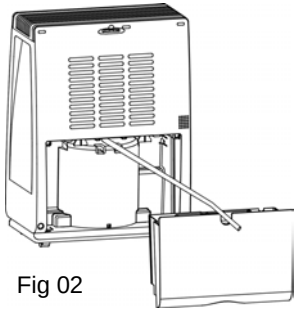

Fig 02

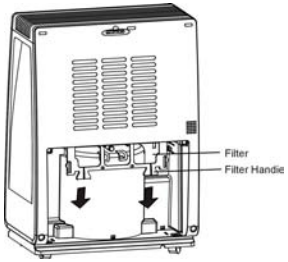
FILTER REMOVAL

1. Take out the water tank before remove the filter.
2. Pulling out the filter with handles of filter.
3. Wash the filter with cool water (cooler than 40℃) every two weeks, and put filter back after it air-dried naturally.



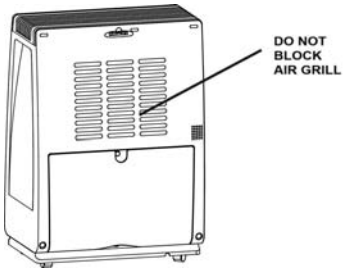
MAINTENANCE INSTRUCTION

1. The unit is not allowed to be placed on surface which is soft or not flat to avoid the unit cause noise, vibration, and water or electricity leakage when operating.
2. Never insert any slim rod or hard stuff into the unit to avoid the damage of the unit.
3. Please disconnect the power cord to the power supply when you turn off the unit or intend to stop using for long time.

don't

do

4. In order to improve the performance of dehumidifier, please keep the unit in open place away from barriers which may block the air.



5. Please wash the filter with cool water (cooler than 40℃) but not gasoline or alcohol every two weeks, and put filter back after it air-dried naturally.

WARRANTY POLICY
